

TRACE SHEET · A3 297 x 420 mm

TAG

T0 _ _

HEIGHT

_ _

Print at 100%. If this bar is not 100mm, write the measured length here: ____ mm

ONE TOOL, lying as it sits in the drawer. Pencil in the TRACE collar, straight up like a candle, collar riding the tool. Trace the OUTSIDE only.

IF IT DOES NOT FIT THE WINDOW: take a bigger sheet. If it is a plain rectangular slab, do not trace it at all.

Write L, W and thickness in the boxes and photograph the sheet.

A SLOT, THROAT OR GAP UNDER 20mm is narrower than the collar and the line cannot enter it. If the tool has one, caliper that one dimension and write it on the sheet.
