

CAPTURE SHEET · LETTER 216 x 279 mm

LETTER window 180 x 180 mm largest tool 170 x 170 corner squares 0-3

tool capture sheet v4, 2026-09-11 (magenta) | tools/trace sheet.py

Print in colour at 100%. If this bar is not 100mm, write the measured length here: ____ mm

LAY: one tool, flat inside the magenta window, on its widest face, as it sits in the drawer, clear of the border.

MEASURE: its tallest point above the sheet, in mm, as it lies. A bottle on its side is its diameter.

SHOOT: from straight above, phone flat, the sheet about a third of the screen, all four corner squares in frame, no flash. The bigger and rounder the tool, the higher the phone.

SUBMIT: the form "CNC tray capture": tag, height, photo. Does not fit the window: take a bigger sheet.
